

Circuit Breaker Pattern

Circuit Breaker Pattern

Implementação de um 'disjuntor' o qual passa para o estado aberto quando detecta um número limite de falhas e assim impede novas e sucessivas chamadas ao serviço que apresenta falhas ou lentidão no momento.

Type of Circuit Breaker: Count

Limit: 25 calls

Failure Rate : 70%

Type of Circuit Breaker: Time

Limit: 50 s

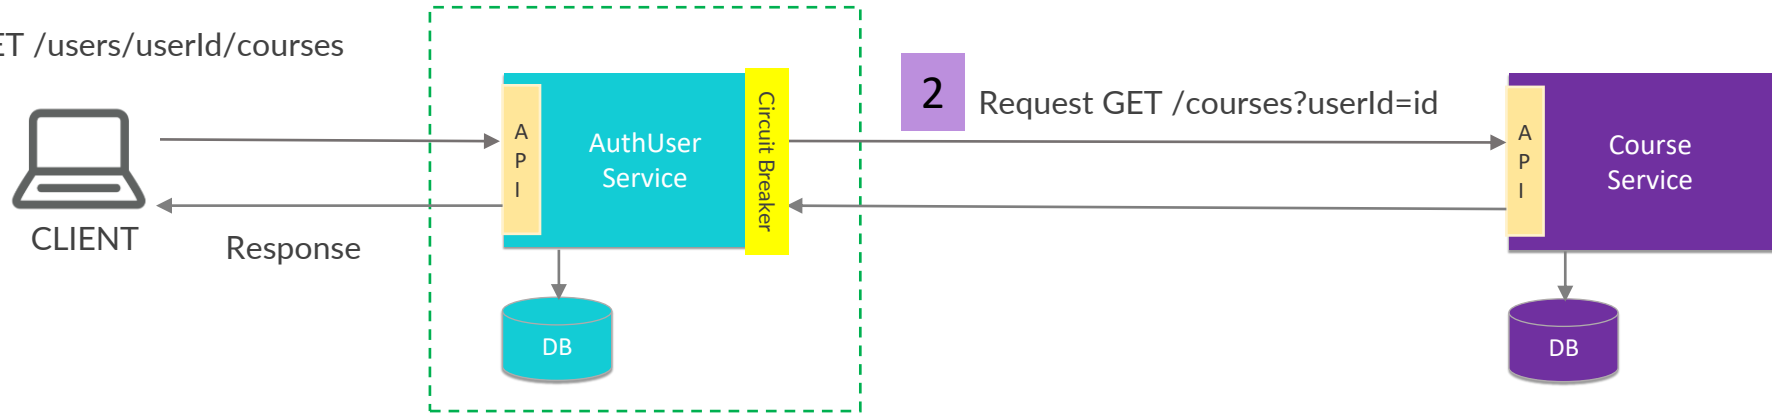

Failure Rate : 80%

Circuit Breaker Pattern - Time-based

```
slidingWindowSize: 50  
permittedNumberOfCallsInHalfOpenState: 3  
slidingWindowType: TIME_BASED  
minimumNumberOfCalls: 20  
waitDurationInOpenState: 50s  
failureRateThreshold: 80
```
